Innovative solutions and uncompromising quality: With over 13 years of experience in special machinery construction, HOF-Automation engineers and manufactures electrical systems for power distribution and automation. The customized services are designed for maximum application diversity. In this way, we unleash enormous potential to decisively advance processes and thus companies in the most modern and efficient manner.

PLANING

Project engineering | Modernization | Documentation

Perfectly tailored concepts that specifically fit the requirements and desires.

PROGRAMMING

Software development | Visualization

Digital optimizations that get the maximum out of processes. Sophisticated solution varieties that even meet the most demanding requirements.

CONTROL CABINET CONSTRUCTION

The highest flexibility and implementation of individual concepts guaranteed.

SERVICE/ MAINTENANCE

Commissioning | Maintenance | Repairs

Wide ranging, reliable premium services on-site, allowing you to fully focus on your business in a relaxed state of mind.

Focusing on
ultimate
efficiency
